RESEARCH EXPERIENCE	<b>University of Southern California</b> , Los Angeles, USA <i>Visiting Researcher (Advisor: Prof. Joseph J. Lim)</i> • Developed attention-based agents which are guided by step-by-step visual instructions to solve hierarchical tasks such as assembling IKEA furniture. Trained agents with self-supervision and semi-supervised learning to achieve generalization of unseen shapes and colors [5].	Jan 2017 – Present
	<b>Lawrence Berkeley National Laboratory</b> , Berkeley, USA <i>Research Intern (Advisors: John Wu, Alex Sim)</i> • Developed baseline models of electricity usage data to find reference usage patterns for different household groups. Used gradient boosting algorithm to capture differences of daily peak usages between groups and analyzed baseline of each group by controlling highly correlated features [1, 4].	Jul 2015 – Aug 2015
	<b>Statistical Artificial Intelligence Lab</b> , UNIST, South Korea <i>Research Intern (Advisor: Prof. Jaesik Choi)</i> • Improved Bayesian changepoint detection models by incorporating external information implicitly written in texts. Incorporated documents as a conditional variable of changepoint prior so that model learns a generative model of texts which represents a relation between textual features and change of data [2].	Sep 2014 – Sep 2015
